

## ***Field Service Bulletin***

### **Water Heaters Damaged By Flooding**

**Model(s) Affected: All Units**

Do not use your water heater if any part has been under water. Immediately call a Qualified Service Technician to inspect the appliance and to replace any part of the control system, and any gas control (including the Defender Safety System ® and associated components), which has been under water.

Depending upon individual circumstances, it may be necessary to replace the entire water heater.
