

## PRODUCT ANNOUNCEMENT

MARCH 7, 2011

### PRODUCT CHANGE NOTICE: Direct Vent Flexible and Solid Vent Kits

Bradford White is pleased to announce a change to the Flexible Vent Kit and Solid Vent Kit on our Direct Vent Residential and Light Duty Commercial models. The Flexible Vent Kit will now come pre-assembled, meaning the outer flexible vent pipe will come spaced evenly with the inner flexible vent pipe and be attached to the vent termination. Because of this change, it significantly reduces the installation time it takes to setup the venting system. Additionally, the vent termination color has been changed from powder coated brown to aluminum on DH Flexible Vent Kits because of customer request, competitive information and to be consistent with the aluminum vent termination on DS Flexible Vent Kits. However, this changes the part number from 239-47813-00 to 239-48915-00.

The Solid Vent Kit vent termination color has also been changed from powder coated brown to aluminum on DH Solid Vent Kits because of customer request, competitive information and to be consistent with the aluminum vent termination on DS Solid Vent Kits. This too changes the part number from 239-47811-00 to 239-48914-00, however there is still the option for a powder coated brown color vent termination on DH Solid Vent Kits under part number 239-42979-00.

#### FLEXIBLE VENT KIT:

Model Category	Part Number	Description
DS	239-47812-00 (current)	Pre-assembled kit with aluminum vent termination
DH	239-48915-00 (new)	Pre-assembled kit with aluminum vent termination

#### SOLID VENT KIT:

Model Category	Part Number	Description
DS	239-47810-00 (current)	Aluminum vent termination
DH	239-48914-00 (new)	Aluminum vent termination

The Specification Sheets will be available on our website, detailing additional information.
