

## PRODUCT ANNOUNCEMENT

APRIL 1, 2011

### PRODUCT CHANGE NOTICE: eF<sup>®</sup> Series Models and 2" Venting Capability

Bradford White is pleased to announce a change to the venting options for some of our Ultra High Efficiency eF<sup>®</sup> Series models. Units rated at 199,999 BTU/Hr and less now have the capability of venting with 2" PVC, CPVC or ABS, up to a maximum of 30 equivalent feet (in either the power vent or power direct vent configuration). This recent change is perfect for those installations where the water heaters are placed near an outside wall. The 2" vent option reduces overall installation costs and allows for an even smaller opening in the side of the building. Additionally, a 2" concentric vent kit (239-44069-02) has been approved for power direct vent applications.

Model Number	Max Vent Length (equivalent feet) 2"	Max Vent Length (equivalent feet) 3"	Max Vent Length (equivalent feet) 4"
EF60T125, EF100T150	30	120	170
EF60T150, EF100T199	30	100	150
EF60T199	30	80	130
EF100T250	N/A	80	130
EF100T300	N/A	60	110

The Specification Sheets will be available on our website, detailing additional information.
