Residential Utility Electric Water Heater

The Utility Electric Models Feature:

- **Fully Automatic Controls**—Fast-acting surface-mount thermostat for automatic temperature control. Factory-installed sensitive manual reset energy cut-off for safety to prevent overheating.
- **Direct Heat Transfer With a Single Immersed Element**—Transfers heat directly and efficiently to the water. Screw-in style element.
- **Vitraglas® Lining**—Bradford White tanks are lined with an exclusively engineered enamel formula that provides superior tank protection from the highly corrosive effects of hot water. This formula (Vitraglas®) is fused to the steel surface by firing at a temperature of over 1600°F (871°C).
- **1" Non-CFC Foam Insulation**—Covers the sides and top of the tank, reducing the amount of heat loss. This results in less energy consumption, improved operation efficiencies, and jacket rigidity.
- **Water Connections**—3/4" NPT factory-supplied true dielectric fittings extend water heater life. Located on the side for easier installation (Fittings packaged separately inside carton).
- **Alternate Top Water Connections**—The 6 and 12 gallon models have alternate 3/4" water connection tappings on top.
- **Protective Magnesium Anode Rod**—Provides added protection against corrosion for long trouble-free service.
- **Voltages Available**—120V, 208V, 240V, 277V, 480V.
- **Single Phase Operation Only**.
- **T&P Relief Valve**—Installed.
- **Design evaluated by ETL in accordance with Part 280.707(d) of HUD Mobile Home Construction and Safety Standards for Energy Efficiency.**

For more information on warranty, please visit www.bradfordwhite.com
For products installed in USA, Canada and Puerto Rico. Some states do not allow limitations on warranties. See complete copy of the warranty included with the heater.

†Maximum wattage at any voltage is 3000W.
For 10 year models, change suffix “6” to “10”.
Single element only.

*Based on 1500W operation.

### General

All models are exempt from NAECA requirements and ASHRAE Standard 90.1b.
All models ETL listed. These heaters are wired Single Phase, 120V with one 1500W element, unless otherwise specified.
All water and electrical connections are 3/4" (19mm) NPT.
All models certified at 30 psi test pressure (2068 kPa) and 150 psi working pressure (1034 kPa).
Applicable models CSA-verified for energy performance in accordance with C191.1-M90.

**Dimensions and specifications subject to change without notice in accordance with our policy of continuous product improvement.**
